## Industrial entrance solutions

In demanding industrial settings, it's crucial to have high-performance entrance solutions. You need industrial doors and dock equipment that are reliable for security and also enhance the visual appeal of your buildings.

Therefore, industrial entry systems must be dependable, durable, functional, and secure to keep your business operations running smoothly.

# Dock shelter & seals

In the fast-paced logistics and warehouse sector, efficiency and safety are key. Yet, one often underestimated aspect is dock seals and shelters. These simple yet essential components play a vital role in streamlining operations, protecting cargo, and keeping workers safe at loading docks.

## Benefits:

- **Weather protection**  
Dock shelter & seal keep out rain, snow, wind, and extreme temperatures, safeguarding cargo and reducing damage risks.
- **Energy efficiency**  
By maintaining consistent indoor temperatures, they reduce heat or cold loss, leading to energy savings.
- **Worker safety**  
They create a safer work environment by minimizing the risk of slips, trips, and falls caused by harsh weather.
- **Enhanced productivity**  
With efficient dock seals and shelters, loading and unloading processes are smoother, boosting productivity and reducing turnaround times.

## YONGLI dock shelter

At YONGLI, our dock shelters are crafted with premium polymer coatings and fabrics. Engineered for durability and reliability, these shelters provide an effective wider seal against the trailer's top and sides, ensuring superior sealing efficiency.

Belt type	6D code	Thickness (mm)	Operation temperature (°C)	Properties
P22-39/0Y	101007	3.0	-30/+80	Laterally rigid, cold resistant
P21-39/0Y	101067	3.0	-30/+80	Laterally flexible, cold resistant
P22-3(2)9/0Y	101010	3.0	-30/+80	Laterally rigid, white stripe fabrication

# Fabrications

We provide custom fabrication services for our dock shelters, typically featuring yellow or white bar options. These high-visibility bars enhance safety by improving truck alignment during docking, ensuring accurate positioning and reducing potential damage.

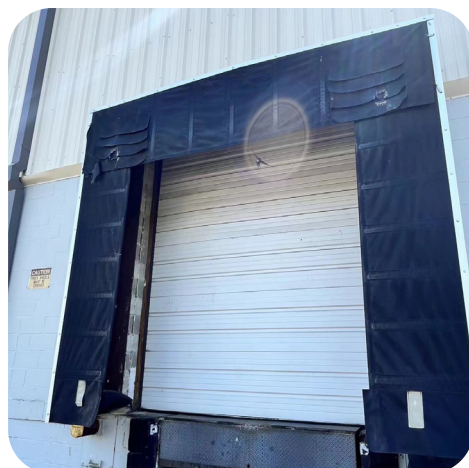

## YONGLI P22-39/0Y vs. Common market materials

While many door curtain products on the market focus on affordability, YONGLI's P22-39/0Y stands out with key benefits:

- **Superior Rigidity:**  
Our curtains maintain excellent stiffness, even across wide door spans, providing better wind resistance. This makes them ideal for external use.
- **Enhanced Puncture Resistance:**  
Reinforced with fabric layers, YONGLI's curtains offer superior protection against punctures compared to thinner, tarp-based products. This helps prevent severe tearing from minor vehicle contact.
- **Improved Flatness:**  
The two-ply structure ensures excellent flatness for a clean, smooth appearance.
- **Resilient Material:**  
The material's elasticity ensures it retains its shape over long-term use, with superior weather resistance.
- **Customizable Options:**  
We offer flexible customization, including small batch production and adjustments to thickness, color, and other features to meet specific customer needs.

# YONGLI inflatable dock seals

Inflatable dock seals create a perfect seal by inflating around the docked vehicle, making them ideal for food industry applications. The yellow front-line indicators help guide vehicles into position with ease. Our inflatable dock seals are compatible with a wide range of vehicle sizes and offer consistent weather protection during the entire loading and unloading process.

## Features:

- **Airtight assurance**  
Crafted with precision using stringent hot welding techniques, our seals guarantee unparalleled air-tightness, keeping your space perfectly insulated.
- **Durable design**  
Engineered with top-grade materials, our seals boast exceptional wear and scratch resistance, ensuring longevity and performance even in the most demanding environments.

*We offer customized inflatable seals tailored to meet the specific needs of our customers.*

## Rapid roller doors

Rapid roller doors are designed to open and close at high operating speeds. They're used across various industries to minimize external influences like strong winds, dust, or bacteria, ensuring product integrity. Plus, they make passage for personnel and equipment smooth and swift.

With their speed and sleek design, these doors efficiently manage traffic flow while enhancing your building's façade.

# YONGLI rapid roller door curtain

YONGLI rapid roller door curtains are designed to meet the demands of modern industrial environments. Our innovative door solution offers a blend of durability, flexibility, and aesthetic appeal, ensuring smooth operation and robust performance in any setting.

In order to meet the very specific demands of several industries, YONGLI rapid roller door curtains can be produced in compliance with industry specific regulations such as: ISO-340 flame retardant, and FDA approval for direct food contact.

## Features:

- **Advanced Top/Bottom Treatments**

Leveraging our expertise in belting technology, we offer doors with specialized top and bottom treatments. Our impregnation process makes the doors lighter and allows for smaller roller diameters. Additionally, our compound treatment delivers exceptional temperature resistance on both sides, ensuring durability and performance in extreme conditions.

- **Excellent wind resistance**

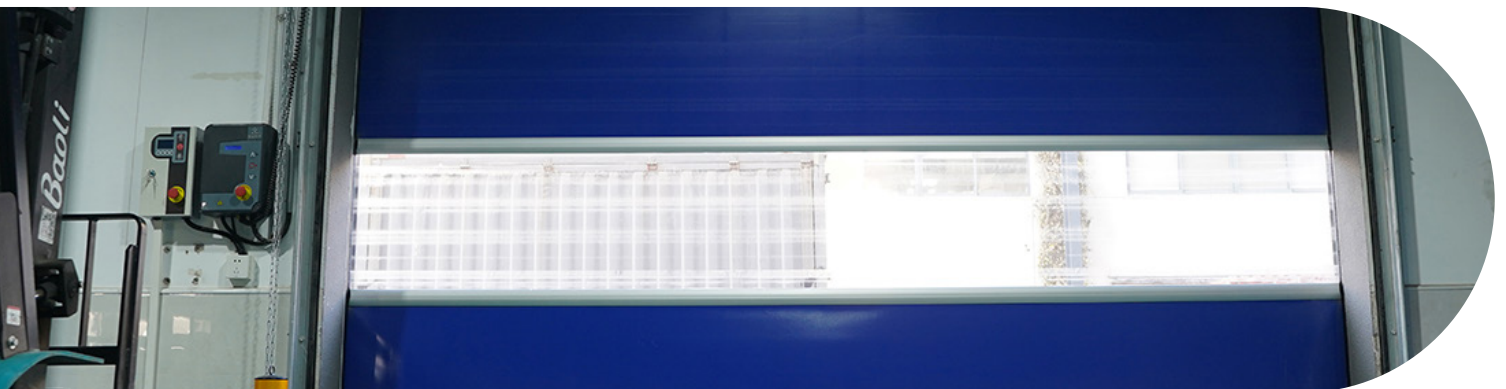

Provides effective protection against strong winds, ensuring stability and security.

- **Longitudinal flexibility**

Soft in the longitudinal running direction, allowing for easy adaptation to various automatic door structures.

- **Superior welding technology**

Guarantees seamless integration of the vision window and enhances the overall aesthetic of the door.

Improve aesthetics and visibility with vision windows seamlessly incorporated into the rapid roll door curtain

Our door curtain products are designed to adapt to various working conditions, providing a comprehensive array of features and color options.

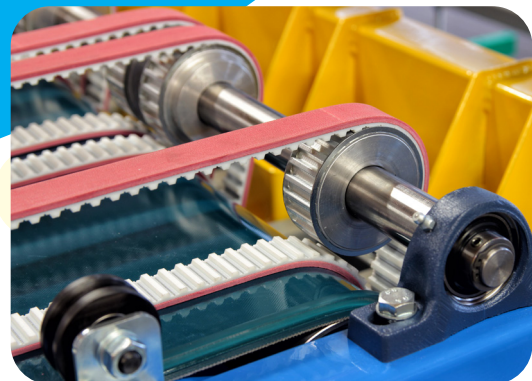

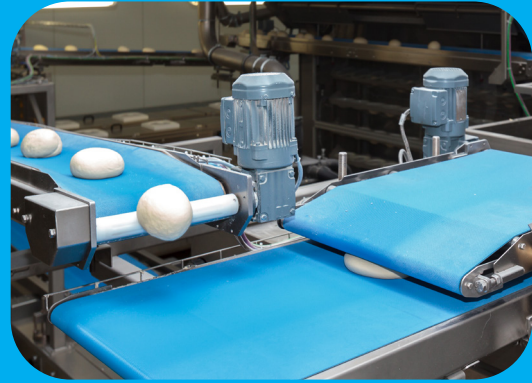

Belt type	Colour	Colour Thickness (mm)	Min. roller diameter (mm)	Operation temperature (°C)	Top/bottom treatment	Properties
P22-47I(4005)	Grey (4005)	1.8	40	-15/+80	Top&bottom Impregnation	
P22-07I(9016)	Beige	1.8	40	-15/+80	Top Impregnation	
P22-57I	Red	2.1	40	-10/+80	Top&bottom Impregnation	
P22-87I(8004)	Blue (8004)	1.8	40	-15/+80	Top&bottom Impregnation	
P22-97I	Orange (Croc)	1.8	40	-15/+80	Top&bottom Impregnation	
P22-37ZDAUI	Black	1.9	60	-15/+80	Top Impregnation	Flame retardant according to ISO 340
P22-87IZ(8004)	Blue (8004)	1.8	40	-10/+80	Top&bottom Impregnation	Flame retardant according to ISO 340
P22-49/OBL FDA(R7011)	Grey	2.5	120	-30/+80	PVC	FDA food grade, increased thermal insulation
P22-89/OBL FDA(R5005)	Blue	2.5	120	-30/+80	PVC	FDA food grade, increased thermal insulation

# YOUR BELTING SOLUTION PROVIDER

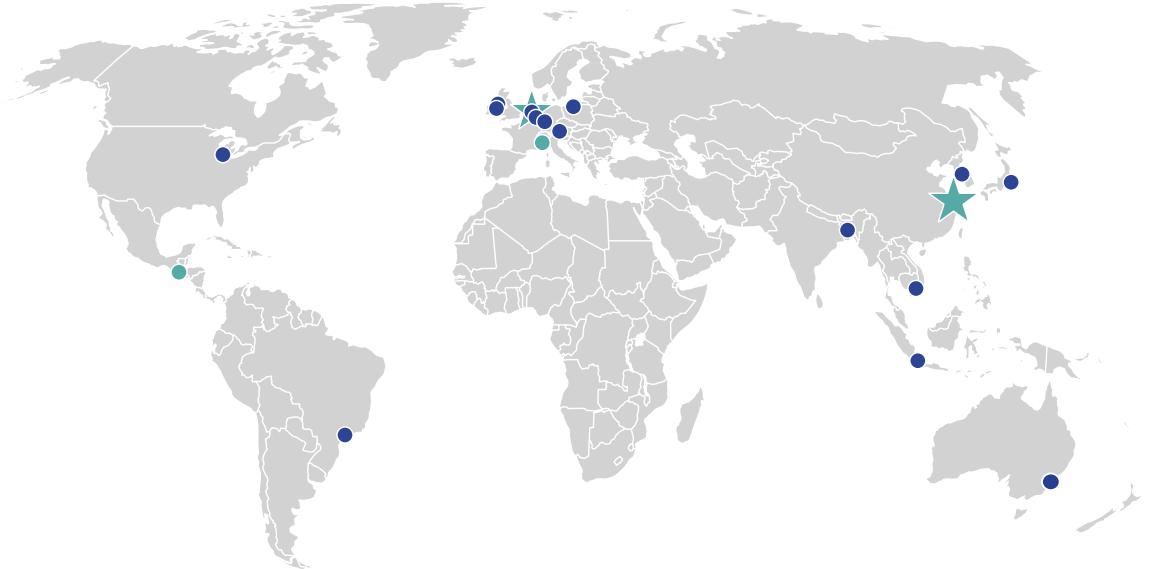

Since its establishment in 1989, YONGLI has always been working to become a total belting solution provider. With a strong focus on research and development, innovation is in the DNA of our company. In recent years, with the implementation of new production technologies, advancements in product development and closely monitoring market trends, YONGLI is stepping up to become not just a producer of light duty conveyor belts, but rather a manufacturer of total belting solutions. With a strong customer orientation, people at YONGLI walk the extra mile to innovate together with our customers and find the right solution for every application.

YONGLI is not just any belting solution provider, we are your belting solution provider.

# THINK GLOBAL, ACT LOCAL

YONGLI has a strong international presence with branch companies and an extensive partner network set up globally, serving customers in over 60 countries across the globe. Powered by its own global production sites in China and the Netherlands, YONGLI acts locally to offer reliable belting solutions and on-time services to end users and oems; and always seeks to grow together with our customers and partners in all aspects.
