Newspaper Applications

Our product assortment fills almost every need. In our Polybelt series we have belts that work on the Stacker and Reel Tension Paster. In our Conveyor series we have belts that work on the Hopper Loaders, Wrappers, and Inserters. We also have Super Endless belts for Strappers.

Some applications are moving toward a “no glue quick melting” process. We can fulfill that need as well with our PolySprint line. These belts use the Quickmelt system with no adhesives necessary. Simple one punch precision, curing for several minutes and in no time, a new belt. This process cuts down time to almost nothing. Our PolySprint belts work on Inserters and Stackers.

Nitta Corporation of America

For all your belting needs.
